1.1.

Useful vocabulary about electricity and electronics

- > **Electric:** adjective used before specific machines or devices that use electricity. Examples: "electric motor" or "electric toothbrush".
- > **Electrical:** adjective used in a more general and technical context for systems that produce or use energy. Examples: "electrical appliances", "electrical engineer", "electrical equipment".
- > **Electronic:** it describes equipment and systems that use computer chips, transistors, and other similar very small parts. Example: "electronic music".
- > **Electricity:** a way of energy resulting from the existence of charged particles. Example: "electricity is expensive nowadays"
- > **Electronics:** has several meanings:
 - » The branch of science and technology that studies currents in electronic equipment. Example: "he is studying electronics at university"
 - » The use of electronic technology, especially in developing new equipment. Example: "the company specializes in consumer electronics".
 - » The electronic circuits and components used in electronic equipment. Example: "the electronics in this laptop are damaged".

1.2.

Jobs in electricity and electronics

- > **Electrician:** is in charge of planning, installing and maintaining electrical wiring systems across a wide variety of environments.
- > **Apprentice:** is a person who works for another to learn a trade.
- > **Industrial electrician:** installs, maintains, and repairs electrical systems in industrial facilities.

1.3.

Let's practise!

1. Use the words we have learnt in the sentences.

1. His kitchen is full of _____ appliances.
2. The Italian scientist Alessandro Volta invented the _____ battery.
3. In China, almost everyone makes _____ payments when they go shopping.
4. Current _____ moves from one place to another.
5. _____ is my favourite subject.

2. Each of the following sentences contains a mistake related to the use of the words electric, electrical, electronic, electricity, or electronics. Replace the underlined word with the correct one from the box.

electric

electrical

electronic

electronics

1. I need to charge my **electrical** toothbrush before the trip.
2. She's studying **electric** at the technical university.
3. We hired an **electric** engineer to design the power system.
4. This shop sells the latest **electrics** in home entertainment.
5. The storm caused serious **electronic** problems in the power grid.
6. That new song uses only **electrical** instruments.

3. Match the jobs related to electricity with the correct definition.

1. Electrician
2. Apprentice
3. Industrial electrician
4. Electrical line worker
5. Power plant operator
6. Electrical appliances repairer
7. Aerial technician

- a. installs, maintains, and repairs electrical systems in industrial facilities.
- b. controls, operates, and maintains machinery to generate electricity.
