- 5.5. Conditional Types 0, 1, 2, 3
 - 5.5.1 Third Conditional and Past Perfect Simple

Introduction

In learning English, it is essential to understand key grammatical structures for effective communication. One important aspect is the use of adjectives ending in -ed and -ing, which help express emotions (bored, excited) and describe situations or things that cause these emotions (boring, exciting). Additionally, too and enough indicate excess or sufficiency, as in too difficult (excessively difficult) or big enough (sufficiently big).

Demonstratives (this, that, these, those) are used to point to objects or people depending on their proximity, while relative clauses with who, which, that, where, whose, when provide extra information about people, things, and places. Furthermore, conditional sentences are structures used to talk about real or hypothetical situations. The zero conditional expresses general truths, the first conditional refers to real possibilities in the future, the second conditional describes unreal or imaginary situations and the third conditional deals with past events that did not happen.

5.1.

Adjectives ending in -ed and -ing

Adjectives ending in -ed

These describe how someone **feels**.

TIP: We use **-ed** when we want to mean **ESTAR** (TO BE).

- > I am **bored**. (I feel bored.)
- > She is **interested** in the book. (She feels interested.)

Adjectives ending in -ing

These describe what **causes** the feeling.

TIP: We use **-ing** when we want to mean **SER** (TO BE).

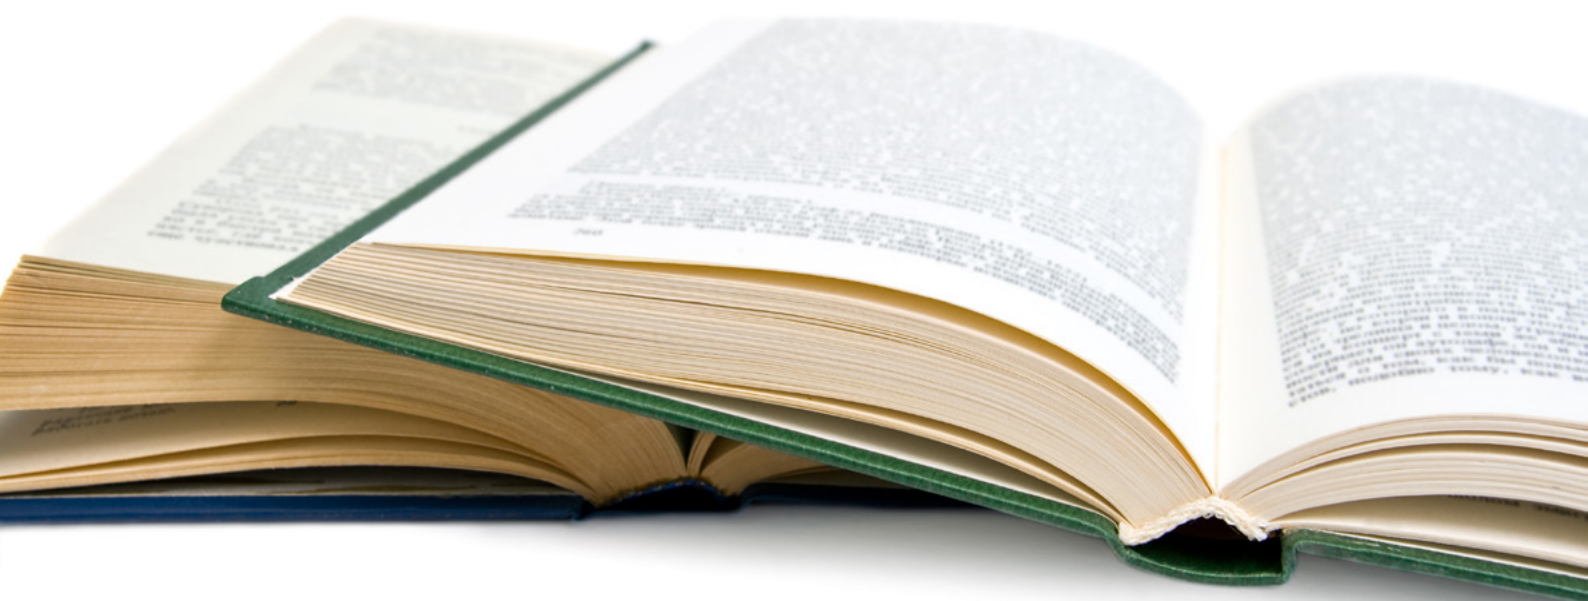

- > The movie was **boring**. (The movie causes boredom.)
- > The book is **interesting**. (The book causes interest.)

-ED (feeling)	-ING (cause of feeling)
Bored	Boring
Excited	Exciting
Confused	Confusing
Annoyed	Annoying
Surprised	Surprising
Tired	Tiring

💡 RECUERDA

Usamos **adjetivos en -ed** para expresar cómo nos sentimos.

Usamos **adjetivos en -ing** para expresar que algo externo a nosotros es la causa de lo que sentimos.

5.2.

Too vs. Enough

Structure: Too + Adjective

We use **too + adjective** to say that something is **more than necessary** or **a problem**.

- > *This bag is **too heavy**.* (It's heavier than I can carry)
- > *The music is **too loud**.* (It's louder than I like)

Structure: Too Much + (Uncountable) Noun

We use **too much + uncountable noun** to express an excessive amount of something.

- > *There is **too much traffic** in the city.*
(Traffic = uncountable noun)
- > *She spends **too much time** on her phone.*
(Time = uncountable noun)

Structure: Too Many + (Plural countable) Noun

We use **too many + plural countable noun** to express an excessive quantity of something.

- > *There are **too many students** in the classroom.*
(Students = countable noun)
- > *I ate **too many sweets** and now I feel sick.*
(Sweets = countable noun)

Structure: Enough + Noun

We use **enough + noun** to say there is **a sufficient amount** (not too little, not too much).

- > *We have **enough time** to finish.*
(The time is sufficient)
- > *There aren't **enough chairs** for everyone.*
(More chairs are needed.)

Structure: Adjective + Enough

We use **adjective + enough** to say if something has the **necessary amount of a quality**.

- > *This bag is **big enough** for all my books.*
- > *This jacket is **warm enough** for winter.*

RECUERDA

Usamos **too + adjective** para decir que algo es más que necesario o por un problema.

Usamos **too much + uncountable noun** para decir que hay una cantidad excesiva de algo.

Usamos **too many + plural countable noun** para decir que hay una cantidad excesiva de algo.

Usamos **enough + noun** para decir que es una cantidad suficiente de algo.

Usamos **adjective + enough** para decir si algo tiene la cantidad necesaria de una cualidad (adjetivo).

5.3.

Demonstratives

Demonstratives are words we use to point to **people, things, or places**. In English, we use **this, that, these, and those** to show distance (**near or far**) and number (**singular or plural**).

Near (Close to you)	Far (Not close to you)
Singular: this (one thing)	Singular: that (one thing)
Plural: these (more than one)	Plural: those (more than one)

Examples

- > **This** book is interesting. (Near, singular)
- > **That** car is fast. (Far, singular)
- > **These** apples are fresh. (Near, plural)
- > **Those** dogs are barking. (Far, plural)

We can use **demonstratives alone** when it is clear what we are talking about.

- > **This** is my favourite song.
- > **That** looks expensive!
- > **These** are my keys.
- > **Those** were amazing holidays.

We can use demonstratives in **questions** to ask about things.

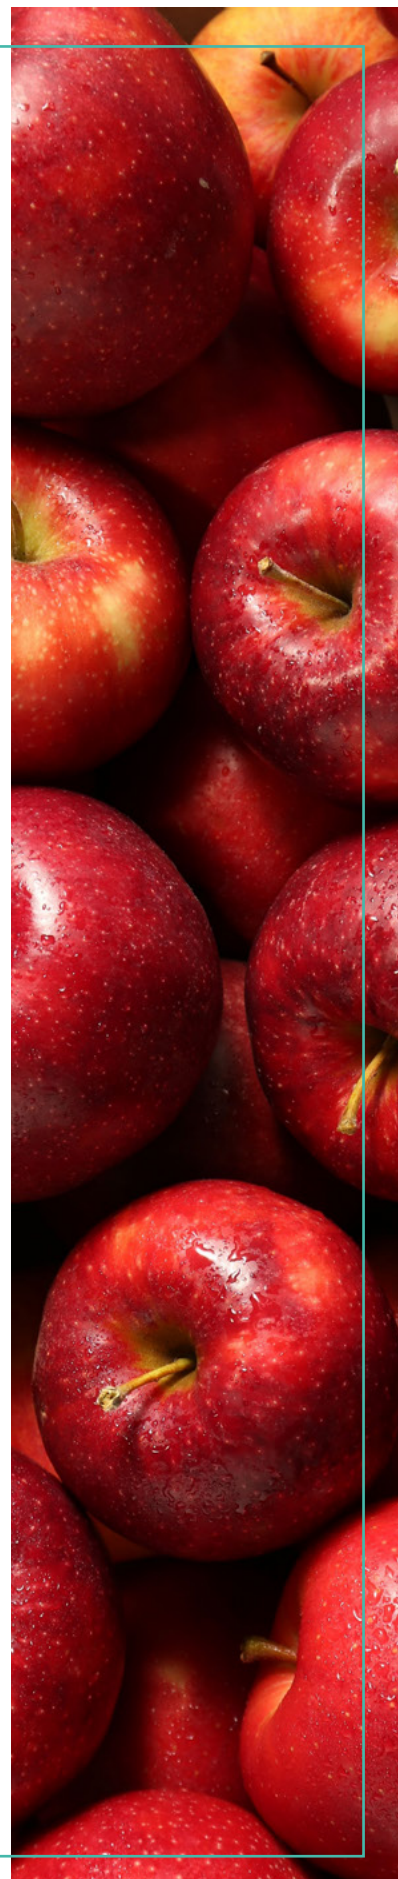

Examples

- > What is **this**? (Near, singular)
- > What are **those**? (Far, plural)
- > Who is **that**? (Far, singular)
- > Are **these** yours? (Near, plural)

RECUERDA

- + Usamos **this** (singular) para indicar cosas u objetos próximos a nosotros.
- + Usamos **these** (plural) para indicar cosas u objetos próximos a nosotros.
- + Usamos **that** (singular) para indicar cosas u objetos lejos de nosotros.
- + Usamos **those** (plural) para indicar cosas u objetos lejos de nosotros.

5.4.

Relative clauses sentences

A **relative clause** gives **extra information** about a noun in a sentence. We use **who, which, that, whose, when** and **where** to connect ideas.

Relative Pronoun	Use	Example
who	For people	The man who lives next door is kind.
which	For things and animals	This is the book which I like.
that	For people, things, and animals	The dog that I found is very cute.
whose	For people and things	She is the girl whose father works in an NGO.
when	To talk about a time	That was the year when I started learning English.
where	For places	This is the park where we play football.

RECUERDA

Usamos **who** para personas.

Usamos **which** para cosas/objetos y animales.

Usamos **that** para personas, cosas/objetos y animales.

Usamos **whose** para personas y cosas/objetos.

Usamos **when** para referirnos al tiempo.

Usamos **where** para lugares.

5.4.1 Types of relative clauses sentences

Relative pronouns can be used to join two sentences. The second sentence after the relative pronoun is called relative clause. There are two types of relative clauses: **defining relative clause** and **non-defining relative clause**.

Defining relative clause

Defining relative clauses give us the essential and necessary information to understand the sentence. If we remove the defining relative clause, the sentence remains incomplete and does not make sense. Pay attention to the example:

*This is the designer. **He** did the drawings.*
*This is the designer **who** did the drawings.*

Non-defining relative clause

Non-defining relative clauses add extra information to the main sentence, but this information is not crucial to understand the meaning of the sentence. If we remove the non-defining relative clause, the sentence still makes complete sense. This kind of sentences has the following characteristics:

- > Always appear between commas.
- > They do not use the pronoun "that".
- > The relative pronoun cannot be omitted.

Pay attention at the following examples:

*Peter is 65 years old. **He** is still working in the firm.*
*Peter, **who** is still working in the firm, is 65 years old.*

RECUERDA

Las oraciones **defining relative clause** van inmediatamente después del nombre al que se refieren.

Las oraciones **non-defining relative clause** van siempre entre comas, no usan el pronombre **that** y el pronombre relativo no puede ser omitido.

5.5.

Conditional Types 0, 1, 2, 3

Zero Conditional

We use the **zero conditional** for **facts, laws of nature, and general truths**.

> Structure:

If + subject + present simple, present simple

- » If you **heat** water, it **boils**. (Fact)
- » If it **rains**, the ground **gets** wet. (General truth)

First Conditional

We use the **first conditional** for **real and possible** situations in the future.

> Structure:

If + subject + present simple, will + verb

- » If you **study**, you **will pass** the exam.
- » If she **invites** me, I **will go** to the party.

Second Conditional

We use the **second conditional** for **imaginary, unreal, or unlikely** situations.

> Structure:

If + subject + past simple, would + verb

- » If I **won** the lottery, I **would buy** a big house.
(But I probably won't win.)
- » If she **had** a car, she **would drive** to work.
(But she doesn't have a car.)

5.5.1 Third Conditional and Past Perfect Simple

So that we can build the **third conditional type**, we need to use the **past perfect simple tense**.

We use the **third conditional** to talk about past situations that did not happen and their imagined results.

Structure

If + past perfect simple, would have + past participle

- > If I **had studied** more, I **would have passed** the exam.
(But I didn't study enough, so I failed.)
- > If she **had left** earlier, she **wouldn't have missed** the train.
(But she left late and missed it.)

RECUERDA

Condicional 0:

If + subject + present simple | present simple.

Condicional 1:

If + subject + present simple | will + verb.

Condicional 2:

If + subject + past simple | would + verb.

Condicional 3:

If + subject + past perfect simple | would have + past participle.

Past Perfect Simple:

Had + past participle.
